Angelica Di Camillo's responses to the unasked questions.
TWiSK Prahran Candidates Forum 8 November 2026.

Drill Hall Sale
The Department of Defence is selling the Drill Hall site on Chapel St, St Kilda East. The state government will have the first option to purchase. This is public land.
Will you commit to retaining at least the bulk of the land in public hands for community use and public benefit?
Angela di Camillo's response: Yes! Public land needs to be for the public good.

Commitment to Treaty
It's time we stopped fighting Victoria's Indigenous Community and learned to walk together into the future as equals, with each having a lot to contribute. The Victorian Treaty was the result of much work, expertise and goodwill.
Will you commit to honouring it?
Angela di Camillo's response: Absolutely. We can't let the Liberal Party tear up the Treaty.

Ending the GP at Albert Park?
Major parties are talking about cutting waste and being open and transparent and working for all Victorians. The F1 GP is conducted on a temporary circuit in Albert Park which disrupts many Victorians for 4 months each year, for a loss of $120M this year and rising, with no evidence of overall positive benefit. This entertainment attendance subsidy by all Victorians benefits only a few.
Will you commit to ending the GP in Albert Park in the interests of all Victorians?
Angela di Camillo's response: I completely agree with the concern around spending priorities. I find it incredibly jarring to see billions of taxpayer dollars being spent on a luxury sporting event when our healthcare and frontline services are underfunded to the point of crisis, and working people are struggling to afford day to day bills. It's an active choice by our government to fund the Grand Prix over housing, healthcare, education, and energy infrastructure, and one that I find completely baffling. I'm committed to making sure that taxpayer money is spent wisely.
I'm also a local resident and I love to run around the lake when it's not shut off to public access, so I understand the disruption to Albert Park's sporting and social function on a personal level.We want to make sure Albert Park is accessible and safe for all of us.

Stronger laws to protect victims?
Criminal infiltration of the building industry was a foreseeable result of the Building Act's compliance gap. Weak criminal laws and infrastructure overspends have fuelled local crime. A previous tenant exposed South Yarra Square to drug-dealing, violence and arson; every legal avenue failed, police admitted current laws leave them powerless, and we had to deal with it ourselves using private security.
Will your party commit to substantial criminal law reform prioritising victim safety, grant

police NSW-aligned statutory powers, build a new Prahran police station, and reopen the Southbank station?
Angela di Camillo's response: We'll target the root causes of crime by investing in mental health, addiction services, homelessness support, housing, youth and family services.

What high-cost project would you cut?
Considering the significant financial pressures facing the next government, what high cost program or project would you/ your party choose to terminate?
Angela di Camillo's response: We can fund our commitments by making big banks, fossil fuel and gambling corporations pay their fair share.

DDA compliant stations
Given an ageing population and that 18.4% of Victorians have disability requirements, *Which Party will finally commit to making Windsor, Hawksburn, and South Yarra Train Stations DDA compliant Today and not delay this for a further 15 years?*
Angela di Camillo's response: The Greens are committed to making all public transport stations accessible as soon as possible.

Help us feel safe
My neighbours in public housing of the Raleigh Demurska Estate, built for the elderly, don't feel safe now parking cars away from their homes. There are reduced hours for local police, and more fires of Prahran commercial premises in the past four years than in the last 40 years. My city hasn't been safe for the past 3 years with weekly protests and blockades. My friends at university don't feel safe. I don't feel safe.
What's the solution?
Angela di Camillo's response: The real solution is dealing with the causes of crime. We're proposing an Office of Community Safety - trained social workers and mental health workers operating 24/7 to keep Prahran safe, freeing up our police to redirect their focus to other crime.
